Part III Statement of Program Service Accomplishments

Check if Schedule O contains a response or note to any line in this Part III

1 Briefly describe the organization's mission: The Ithangane Project achieves lasting improvements in health outcomes, beginning in Rwanda, by promoting community-driven solutions that strengthen national health systems. The successful solutions we co-create with local communities are shared with the national government.

2 Did the organization undertake any significant program services during the year which were not listed on the prior Form 990 or 990-EZ? No

3 Did the organization cease conducting, or make significant changes in how it conducts, any program services? No

4 Describe the organization's program service accomplishments for each of its three largest program services, as measured by expenses. Section 501(c)(3) and 501(c)(4) organizations are required to report the amount of grants and allocations to others, the total expenses, and revenue, if any, for each program service reported.

4a (Code:) (Expenses \$ 714,301 including grants of \$) (Revenue \$) E-Heza: TIP's E-Heza Data Solutions is a digital application that can be used on a smartphone or tablet designed by and for the frontline health worker. E-Heza captures essential data at the point of care to improve the health of mother and child by providing frontline health workers with immediate insights to help personalize information and advice, and help the mother track the well-being of her child. That data is automatically linked to the Ministry of Health database, providing timely and accurate data reports for better public health policy decision making. Since 2018, E-Heza has improved quality of care for over 60,000 mothers and children, and by 2022, will reach nearly 250,000 patients across Rwanda. With endorsement from Rwanda's Minister of Health, TIP is working to scale E-Heza throughout Rwanda to serve as a foundation for all of primary care.

4b (Code:) (Expenses \$ 219,740 including grants of \$) (Revenue \$) Clinical Care Innovation: The Ithangane Project works with local healthcare workers and the Rwanda Ministry of Health to improve the quality of direct patient care services by ensuring that frontline healthcare workers have the tools they need to successfully deliver primary healthcare. We have co-created tools such as E-Heza Data Solutions, the TIP Education Model and the 5 Pillars of Quality Improvement Framework alongside frontline healthcare workers to overcome barriers and celebrate improvements in processes and health outcomes. E-Heza is a point of care digital health record designed by and for the health care worker, used to improve quality of maternal-child care by making it easier for nurses to do their jobs, for mothers to track the wellbeing of their children, and for ministry officials to receive data in real-time.

4c (Code:) (Expenses \$ 164,987 including grants of \$) (Revenue \$) Aheza Fortified Food (AFF): provides consistent, affordable fortified porridge to hospitals, nongovernmental org's, and community members while subsidizing the cost of free distribution to the highest risk children. Nutrition is an essential component of adequate primary care; health centers have long struggled with stock outs of fortified porridge and commercial products are often too expensive for rural families to access. AFF is a social enterprise established by TIP in 2015 to address stock outs of porridge needed to treat childhood malnutrition. Porridge is sold in bulk to NGOs, governments and social enterprises who then provide the porridge to their beneficiaries for free or low cost. Profits from Aheza sales subsidize the cost of free distribution of porridge to high risk children in Ruli. Since its launch in 2015, TIP's Aheza program has provided over 2.4 million servings of porridge to over 42,000 Rwandans, 92% of whom are high-risk for malnutrition.

Explanation

Women's Association and Hope Initiative. Hope Initiative: The Ithangane Project is conducting research on the influence of hope on health outcomes. We began by identifying an objective tool for measurement, called the Herth Hope index. We worked with healthcare workers and healthcare recipients to ensure that this index- originally established in the United States- would be valid and reliable in the Rwandan context. We are conducting an in depth analysis of influencers of hopelessness and hopefulness in health care systems and will identify interventions based upon this analysis. Our first objective is to demonstrate the ability to increase hopefulness among healthcare workers and healthcare recipients. Ultimately, we will demonstrate that hopefulness is critical to improvements in health outcomes and that it must be considered in the design of effective health systems.
