Explanation

Clinical Care Innovation: The Ihangane Project works with local healthcare workers and the Rwanda Ministry of Health to improve the quality of direct patient care services by ensuring that frontline healthcare workers have the tools they need to successfully deliver primary healthcare. We have co-created tools such as E-Heza Data Solutions, the TIP Education Model and the 5 Pillars of Quality Improvement Framework alongside frontline healthcare workers to overcome barriers and celebrate improvements in processes and health outcomes. E-Heza is a point of care digital health record designed by and for the health care worker, used to improve quality of maternal-child care by making it easier for nurses to do their jobs, for mothers to track the wellbeing of their children, and for ministry officials to receive data in real-time.
